

Carisurg Career Challenge

Time Management for MedTech Students

Tessa Adams | May 26, 2026

OVERVIEW

I have created a tentative daily schedule for Weeks 1–12 of the Carisurg program to improve structure and consistency in my routine. It sets aside protected study time and includes time management strategies such as the ABC prioritisation system (urgent and important, important but not urgent, and low priority), as well as the Pomodoro technique to support focus, steady progress, and task completion.

Week 0 Self Reflection & Context

- I try to complete assignments early to avoid last-minute pressures, though I sometimes take longer than expected
- I work remotely, which requires flexible time management
- My weekends are open but currently focused on packing for a move
- I am most productive in the evening but can adjust when needed
- I learn best by taking detailed notes and reviewing them the next day
- A simple to-do list helps me stay organised by breaking tasks into smaller, manageable steps

Plan Moving Forward

- Create a steady daily rhythm with clear study blocks
- Use an ABC system to prioritise tasks (A = urgent, B = important, C = optional)
- Try the Pomodoro technique to stay on track and avoid drifting
- Reduce last-minute work by planning more consistently
- Build a balanced routine that supports study, work, and personal responsibilities

Past Week Summary

DATE: **MAY 20 - MAY 26** WEEK: **0** 1 2 3 4

WED

Gym, Work (remote), Carisurg sessions & deliverable, Run errands, Pack, Unwind, Prep for next day

THURS

Gym, Work (remote), Carisurg sessions & deliverable, Pack, Unwind, Prep for next day

FRI

Gym, Work (remote), Carisurg sessions, deliverable, Pack, Social time

SAT

Gym, Carisurg deliverables, Pack, Clean, Social time

SUN

Gym, Carisurg deliverable, Pack, Cook for the week, Prep for the week

MON

Gym, Work (remote), Carisurg sessions & daily deliverable, Pack, Unwind, Prep for next day

TUES

Gym, Work (remote), Carisurg sessions & deliverable, Pack, Unwind, Prep for next day

WEEKLY GOALS

Read more
(one book a month?)

Do more arts and craft

Work on carisurg final project
(Research)

Be in bed by 10pm

PREVIOUS WEEK

Same general schedule
except no Carisurg sessions

I traveled to visit parents and for
my best friend's graduation

NOTES:

- Adjusted from flexible hours to a structured schedule
- Balanced Carisurg, work, and personal commitments
- Grew comfortable in the program with support from peers and mentors

New Daily Schedule

DATE: JUNE 1, 2026

WEEK: 1-12

MONDAY-FRIDAY STRUCTURE:

07:00–09:00AM: Morning routine / preparation

- Check to-do list for the day

09:00–12:00PM: A Tasks (Urgent + Important)

- Log on for work
- Check discord for new messages
- Carisurg morning session
- Begin deliverable

12:00–12:30 Lunch / break

12:30–2:00PM: Run errands / to-do list tasks (if any)

2:00–5:00PM: (protected 3-hour core study block)

- Carisurg afternoon session
- Complete deliverable & submit
- Note consolidation & revision
 - Try Pomodoro technique
- check discord for new information
- Prep for next day

5:00–7:00: B Tasks (Important but Not Urgent)

- revisit to-do list for the day
- Make to-do list for tomorrow
- Pack & organize apartment
- self care

7:00–9:00 – C Tasks (Nice to have)

- social time
- screen time

9:00–10:00

- get ready for bed!
- screens off by 10PM

WEEKLY GOALS

dedicate 3–5 hours daily for MedTech program work.

Read more
(one book a month?)

Do more arts and craft

Work on carisurg final project
(Research)

be in bed by 10pm

IMPORTANT DATES

Last day of remote work
June 5

Moving
June 15-17

SISTER WEDDING IN SLU
AUG 5-12

NOTES TO SELF

A = Urgent and important

B = Important but not urgent

C = Nice to have

CONSISTENCY
BEATS INTENSITY

DISCIPLINE > MOTIVATION

Closing

Week O of the Carisurg MedTech Pathways program has been an engaging and insightful introduction to clinical and technical concepts. The triage pseudocode task was particularly challenging for me, but it strengthened my problem-solving skills and highlighted areas where I can continue to improve. The support from peers and mentors also made the experience especially positive and motivating.

This week encouraged me to reflect on how I balance work, study, and personal responsibilities, reinforcing the importance of structure and effective time management. In response, I have established a protected daily study block from 2:00–5:00pm to support focused learning after my other commitments. During this time, I plan to focus on studying, completing assignments, and applying strategies such as the Pomodoro technique to help me stay productive and focused.

Moving forward, my goal is to continue building consistency, strengthening my time management skills, and deepening my technical and clinical understanding throughout the program.

Thank you to the Carisurg team for their guidance throughout Week O.
