

Carisurg Career Challenge

Time Management for MedTech Students

Tessa Adams | May 26, 2026

OVERVIEW

I have developed a tentative weekly schedule and study plan for Weeks 1–12 to improve structure and consistency. This includes protected daily study time, a clear organised timetable, and the use of time management techniques such as the ABC prioritisation system (urgent and important, important but not urgent, and low priority) alongside the Pomodoro technique to improve focus, productivity, and task completion.

Week 0 Self Reflection & Context

- I tend to complete assignments early to avoid last-minute pressure
- I work remotely, which requires flexible time management
- My weekends are flexible but currently focused on packing for a move
- I am most productive in the evening, although I remain adaptable depending on daily demands.
- My learning style involves detailed note-taking and repeated review to reinforce understanding
- A to-do list helps me stay organised by breaking tasks into clear steps.

Plan Moving Forward

- Introduce a more structured daily routine with dedicated study blocks
- Use an ABC system to prioritise tasks (A = urgent, B = important, C = optional)
- Try the Pomodoro technique to improve focus and productivity
- Reduce last-minute work by planning more consistently
- Build a balanced routine that supports study, work, and personal responsibilities

Past Week Summary

DATE: **MAY 20 - MAY 26** WEEK: **0** 1 2 3 4

WED

Gym, Work (remote), Carisurg sessions & deliverable, Run errands, Pack, Unwind, Prep for next day

THURS

Gym, Work (remote), Carisurg sessions & deliverable, Pack, Unwind, Prep for next day

FRI

Gym, Work (remote), Carisurg sessions, deliverable, Pack, Social time

SAT

Gym, Carisurg deliverables, Pack, Clean, Social time

SUN

Gym, Carisurg deliverables, Pack, Cook for the week, Prep for the week

MON

Gym, Work (remote), Carisurg sessions & daily deliverable, Pack, Unwind, Prep for next day

TUES

Gym, Work (remote), Carisurg sessions & deliverable, Pack, Unwind, Prep for next day

WEEKLY GOALS

Read more
(one book a month?)

Do more arts and craft

Work on carisurg final project
(Research)

Be in bed by 10pm

PREVIOUS WEEK

Same general schedule
except no Carisurg sessions

I traveled to visit parents and for
my best friend's graduation

NOTES:

- Adjusted from flexible hours to a structured schedule
- Balanced Carisurg, work, and personal commitments
- Settled into the program with support from peers and mentors

DISCIPLINE > MOTIVATION

Tentative Weekly Schedule

DATE: **JUNE 1, 2026**

WEEK: **1-12**

MONDAY-FRIDAY STRUCTURE:

07:00–09:00AM: Morning routine / preparation

09:00–12:00PM: A Tasks (Urgent + Important)

- Log on for work
- Check discord for new messages
- Carisurg morning session
- Begin deliverable
-

12:00–1:00: Lunch / break

1:00–2:00PM: Run errands (if any)

2:00–5:00PM: (protected 3-hour core study block)

- Carisurg afternoon session
- Complete deliverable & submit
- Note consolidation & revision
 - Try Pomodoro technique
- check discord for new information
- Prep for next day

5:00–7:00: B Tasks (Important but Not Urgent)

- See to-do list for the day
- make to-do list for tomorrow
- Pack & organize apartment
- self care
-

7:00–9:00 – C Tasks (Nice to have)

- social time
- screen time

9:00–10:00

- get ready for bed!
- screens off by 10PM

WEEKLY GOALS

dedicate 3–5 hours daily for MedTech programme work.

Read more
(one book a month?)

Do more arts and craft

Work on carisurg final project
(Research)

be in bed by 10pm

IMPORTANT DATES

Last day of remote work
June 5

Moving
June 15-17

SISTER WEDDING IN SLU
AUG 5-12

NOTES TO SELF

A = Urgent and important

B = Important but not urgent

C = Nice to have

CONSISTENCY
BEATS INTENSITY

DISCIPLINE > MOTIVATION

Closing

As we close Week O of the Carisurg MedTech Pathways programme, I found the experience enjoyable and insightful, particularly in learning new clinical and technical concepts. The Triage pseudocode task was challenging but helped develop my problem-solving skills and identify areas for improvement. It also encouraged reflection on my time management across work, study, and personal commitments. Overall, it has been a positive experience, supported by engaged peers and encouraging mentors.

Week O reinforced the importance of structure, consistency, and effective time management. I have set my protected study block from 2:00–5:00pm daily to fit my routine and allow focused, uninterrupted study after daily commitments. This time will be used for deeper learning, assignments, and applying the ABC prioritisation system and Pomodoro technique. I aim to continue improving my time management, consistency, and clinical understanding throughout the programme.

Thank you to the Carisurg team for their guidance throughout Week O.
